

RESPONSE TO COUNCILLOR INQUIRY / SUGGESTION

COUNCILLOR SANDS

Councillor Sands provided information regarding poplar trees along the pathway north of the Cimarron Estates Villas that appear to be diseased and suggested that Administration make an onsite assessment to gauge whether these trees are a concern.

Response

There are some poplar trees showing signs of decline in the area. Yellowing leaves and some staining on the bark suggests that disease could be a factor. These trees were assessed for risk of fail, but were not identified as a concern. As these trees are located in a natural area, natural processes are permitted to occur, and no action is recommended at this time.
