Project Number

347

Project Name

Fire Water Tanker / Tender Unit New

Project Description

Full size tender for supplementing waters supplies at incidents.

Project Benefit

This project was identified in the Fire Master Plan. The existing tender is undersized (1800 gallons). A full size tender would increase the capacity to 3000 - 3500 gallons. Effectively increasing the capacity of the water carried in each run to incidents and reduce the turn around time to refill and retrain to the incident thus increasing effectiveness of and water capacity to the incident and improving Firefighter safety.

Scope of Work

Purchase new Water Tender unit.
