E	Base Rate Residential, Irrigation, Commercial, Industrial, Institutional Meter Size 150mm (6")	2024-01-01	775.00	809.00	Billing period
E	Consumption (based on cubic metres of water consumption x 0.9)	2024-01-01	2.30	2.30	Cubic metre

Sanitary is billed at a 0.9 factor to reflect that not all water that enters a premises returns to the sanitary system

~~Irrigation Water—sanitary exemption:~~

~~Water consumption average over the three winter billing periods (December, February and April) will establish the non-irrigation average consumption.~~

~~Water volumes consumed that are over the non-irrigation average consumption will be exempt from the sanitary consumption charge during the three "summer billing periods (June, August and October).~~

~~Customers/Premises that do not have a complete history of consumption for the three full winter billing periods have an estimated consumption of 45 cubic meters applied to each billing period that is not a complete month history of consumption. Once a complete winter billing (3 billing periods) history is established, actual winter billing period average will be applied.~~

E	Sanitary Service Surcharge:		TBD To Be Determined	TBD	See below

1) When tests carried out pursuant to this Bylaw show that the sewage from any commercial or industrial premises has a biochemical oxygen demand greater than three hundred milligrams per litre or suspended solids in excess of three hundred milligrams per litre, then the owner of the premises shall be subject to a surcharge in addition to the sanitary charge.

2) The Sanitary Service Surcharge shall be determined in cents per cubic metre of sewage discharged into the sewage system and shall be levied in accordance with the formula set out below:

The formula for determining the surcharge to be levied is : $R = (0.0722 * B) + (0.0808 * S) + (0.0832 * G)$, where:

- "R" means rate in cents per cubic meter

- "B" means the amount in milligrams per litre by which the biochemical oxygen demand of the sewage tested exceeds three hundred milligrams per litre

- "S" means the amount in milligrams per litre by which the suspended solids of the sewage exceeds three hundred milligrams per litre; and

- "G" means the amount expressed in milligrams per litre by which the grease content of the sewage tested exceeds one hundred milligrams per litre

3) For the purpose of establishing the surcharge on a bi-monthly basis the rate established above (R) is to be multiplied by the number of cubic metres of water consumed for the billing period on the commercial or industrial premises determined on the same basis as that used in setting the sanitary service charge.
