Response

Approximately 70% of Town owned facilities have been converted to high efficiency lighting. The work plan for 2018 includes upgrading the lighting in the Stockton Block, Seamen's Stadium Parking lot, the Ambulance Bay at Fire Station #1 and the original portion of the Pason Arena. It should be noted that a portion of the lighting is on a replacement upgrade program, as they burn out they are replaced with LED tubes. The decision to upgrade the lighting is based on the payback on investment and available funding programs. Circumstances are evaluated to ensure the Town is being economically and environmentally responsible when deciding to replace bulbs.
